Baniya—a derivative of the Sanskrit word Vanij, is a term synonymous with India's trader class. Over the decades, these capitalists spread their footprint across vast sectors of the economy from steel and mining to telecom and retail. And now even e-tail. Nikhil Inamdar's Rokda features the stories of a few pioneering men from this mercantile community—Radheshyam Agarwal and Radheshyam Goenka, founders of the cosmetic major Emami; Rohit Bansal, co-founder of Snapdeal; Neeraj Gupta, founder of Meru Cabs; and V.K. Bansal, a humble mathematics tutor whose genius spawned a massive coaching industry in Kota—amongst others. Through the triumphs and tribulations of these men in the epoch marking India's entire post independence struggle with entrepreneurship—from the License Raj to the opening up of the floodgates in 1991, and the dawn of the digital era—Rokda seeks to uncover the indomitable spirit of the Baniya.

Thinking of starting up a business? Hoping it will succeed beyond your wildest dreams? You could start with advice from someone who knows. R.S. Agarwal, along with his friend R.S. Goenka, has built a business from scratch, failed, picked himself up and now heads Emami - a multinational brand Made in India. His wisdom on various business and personal aspects is distilled in an easy-to-read and insightful narrative about his life and business. It is a concise, compelling read for every entrepreneur, whether just starting out or well-established. Agarwal combines a pragmatic, down-to-earth approach to work and the rat race with a childlike wonder and the utopian daydreams of the eternal optimist. With rare sensitivity and humanity, good, old-fashioned ethics and cutting-edge technology, Agarwal has transformed a dream into the business giant it is today. This book tells the story of that odyssey with candour and sagacity. There are short stories that deliver home truths, snippets that delight and quotes that enlighten. Business: The Emami Way is, in short, an MBA in an easy-to-understand handbook.

The best country-by-country assessment of human rights. The human rights records of more than ninety countries and territories are put into perspective in Human Rights Watch's signature yearly report. Reflecting extensive investigative work undertaken by Human Rights Watch staff, in close partnership with domestic human rights activists, the annual World Report is an invaluable resource for journalists, diplomats, and citizens, and is a must-read for anyone interested in the fight to protect human rights in every corner of the globe.

Economic Value Added (EVA®) has been a much discussed concept that has assisted in the turnaround of a number of multinational enterprises across the world. It is based upon the theory of 'economic profit' that enables companies to capture and create wealth both for themselves and their stakeholders. The strategic decisions of performance and posturing can be grounded upon gaining competitive advantage through mapping economic profits. Existing studies on competitive advantage primarily discuss the meaning, definitions, and sources thereof. However, there are few contributions that discuss how competitive advantage can be measured specifically with respect to Indian companies. This book bridges that gap and advocates that the EVA® can be used to measure and establish the competitive advantage for Indian firms. It is based upon an in-depth study of such companies to explore the extent of use of EVA® in the top BT500 companies in India. It shows that the companies that use EVA® have a distinct competitive advantage over their competitors.

The best country-by-country assessment of human rights. The human rights records of more than ninety countries and territories are put into perspective in Human Rights Watch's signature yearly report. Reflecting extensive investigative work undertaken by Human Rights Watch staff, in close partnership with domestic human rights activists, the annual World Report is an invaluable resource for journalists, diplomats, and citizens, and is a must-read for anyone interested in the fight to protect human rights in every corner of the globe.

Presents a disease-focused perspective Includes the latest on the medicinal chemistry of natural products Covers natural products in drug delivery

Efficient financial management is the essence of business. This book analyses and evaluates core financial management practices of corporate enterprises in India across diverse sectors including realty, FMCG, pharmaceutical, automobile, IT, chemical and BPO sectors. It emphasizes the importance of the integrated process of capital investments, financing policy, working capital management and dividend distribution for shareholders for a developing economy as India. It further highlights the need for financial viability both in totality and segmental performance. The volume also offers a comparative study of the practices of the companies in different sectors to allow a better appreciation of the issues and challenges regarding management of finances. Rich in case studies, this book will be an indispensable resource for scholars, teachers and students of financial management, business economics as also corporate practitioners.

Followed by the previous part (Volume-1), Volume-2 of carbon footprint assessment book deals with the assessment of carbon footprint in different other sectors, which were not dealt in the first part. Attention on Carbon footprint is growing day-by-day from the public, government and media. Certainly it is one of the most important topics in the agenda of every nation, which is trying its best to reduce its carbon footprint to the maximum possible extent. Every manufacturing industry or sector would like to reduce the carbon footprint of its products and consumers are looking for the products which emit lower carbon emissions in their entire life cycle. Assessment of Carbon footprint for different products, processes and services and also carbon labeling of products have become familiar topics in the recent past in various industrial sectors. Every industry has its unique assessment and modeling techniques, allocation procedures, mitigation methods and labeling strategies for its carbon emissions. With this background, volume two of this book has been framed with dedicated chapters on carbon footprint assessment on various industrial sectors, apart from the ones covered in Volume 1. In each chapter, details pertaining to the assessment methodologies of carbon footprint followed in a particular industry, challenges in calculating the carbon footprint, case studies of various products in that particular industry, mitigation measures to be followed to trim down the carbon footprint, recommendations for further research are discussed in detail.
