This complete self-study course on coding combines content, practice, and self-assessment into one online learning tool that the learner can follow at his or her own pace. The online program assumes the role of instructor, guiding individuals through the material and directing them when to read relevant sections from the text, checking their comprehension along the way, and providing feedback and encouragement. Users follow the program and learn at their own pace, working through chapter "lesson lectures" and reading assigned sections of the text as they progress. Interactive exercises, questions, and activities allow users to check their comprehension and learn from immediate feedback. Illustrations clarify concepts and familiarize students with the clinical procedures they are learning to code. Chapter exams are scored and incorporated in a grade book, which users can view to evaluate their progress. A series of approximately 18 SlideShows with audio narration explain and demonstrate clinical procedures. Hypertext links incorporated into the lesson lectures open pop-up boxes with further explanations and/or definitions of concepts and terms. Links to relevant web sites provide additional resources to enhance learning or stimulate discussion within a cohort group. An extensive glossary of approximately 650 terms provides correct definition for key terms throughout the course. All content has been updated to current industry standards; for use with Step-by-Step Medical Coding, 5th Edition ensuring that students learn from the most up-to-date material available. Each online chapter includes engaging "lesson lectures" by the author, guiding the learner through the online and text content. Interspersed self-comprehension questions, learning activities, and lesson quizzes throughout the online content allow learners to check their comprehension and learn from feedback. End-of-chapter review and self-assessment exercises include a specially created case-based coding activity, as well as matching, fill-in-the-blank, and multiple choice. Answers to the textbook exercises allow students to check their work on the exercises printed in the text against the answers posted within the course.

The blockbuster bestseller that kickstarted a new genre--the medical thriller--is now available in trade paperback for the first time. They called it "minor surgery," but Nancy Greenly, Sean Berman and a dozen others--all admitted to Boston Memorial Hospital for routine procedures--were victims of the same inexplicable, hideous tragedy on the operating table. They never woke up. Susan Wheeler is a third-year medical student working as a trainee at Boston Memorial Hospital. Two patients during her residency mysteriously go into comas immediately after their operations due to complications from anesthesia. Susan begins to investigate the causes behind both of these alarming comas and discovers the oxygen line in Operating Room 8 has been tampered with to induce carbon monoxide poisoning. Then Susan discovers the evil nature of the Jefferson Institute, an intensive care facility where patients are suspended from the ceiling and kept alive until they can be harvested for healthy organs. Is she a participant in--or a victim of--a large-scale black market dealing in human organs?

We hear plenty about the widening income gap between the rich and the poor in America and about the expanding distance separating the haves and the have-nots. But when detailing the many things that the poor have not, we often overlook the most critical--their health. The poor die sooner. Blacks die sooner. And poor urban blacks die sooner than almost all other Americans. In nearly four decades as a doctor at hospitals serving some of the poorest communities in Chicago, David A. Ansell, MD, has witnessed firsthand the lives behind these devastating statistics. In The Death Gap, he gives a grim survey of these realities, drawn

from observations and stories of his patients. While the contrasts and disparities among Chicago’s communities are particularly stark, the death gap is truly a nationwide epidemic—as Ansell shows, there is a thirty-five-year difference in life expectancy between the healthiest and wealthiest and the poorest and sickest American neighborhoods. If you are poor, where you live in America can dictate when you die. It doesn’t need to be this way; such divisions are not inevitable. Ansell calls out the social and cultural arguments that have been raised as ways of explaining or excusing these gaps, and he lays bare the structural violence—the racism, economic exploitation, and discrimination—that is really to blame. Inequality is a disease, Ansell argues, and we need to treat and eradicate it as we would any major illness. To do so, he outlines a vision that will provide the foundation for a healthier nation—for all. As the COVID-19 mortality rates in underserved communities proved, inequality is all around us, and often the distance between high and low life expectancy can be a matter of just a few blocks. Updated with a new foreword by Chicago mayor Lori Lightfoot and an afterword by Ansell, *The Death Gap* speaks to the urgency to face this national health crisis head-on.
