Indulca mei radices."The Conversation of Merachefet: A Book of Secrets" is best interpreted as "an intrinsic esoteric conversation" in which the essence of all purpose and of all universal form are discussed. A free-flowing dialogue designed as a single lengthy conversation, this writing is described by the author to be her "most revealing work ever." The pages within will take you on an inward odyssey of seraphic discoveries, which can be likened only unto pure magic, raw wisdom, and deific insight. The word "Merachefet" itself is given to mystical terminology. It has been discussed, highly valued by, the wisest of ancient rabbis and sages. The name C. JoyBell C. has become synonymous with the virtues of wisdom and beauty, while her globally scattered words are readily gathered by people from all walks of life; from the most respected of doctors, professors, astronomers, movers and shakers of the world today; to the most current celebrities and the humblest of individuals in society! Such an equanimity and symphony are produced by her words, however, have you ever stopped to ask yourself what the root of all this is, where it all comes from? Within the covers of this book, you will find those roots uncovered, exposing a pure and eternal form of knowledge that will render you to an utterly Elysian experience.

Not sure how to work into a chain space or between stitches? Wondering what is meant by a working row? Confused about how to decrease in half double crochet? Jessie Lucente recently moved in with her grandma in New Bern, NC. A cozy town for retiree's and home of Nicholas Sparks, but not good for a teenage girl. Jessie is reintroduced to Caleb Baldwin, the nerdy boy that rescued her from drowning one summer. Caleb isn't scrawny and dorky anymore, he is tall, dark, and very handsome. Caleb is a Light Tamer and he needs Jessie for his survival. He is bound to her because he saved her life and now he is falling for her...because she's almost perfect. Jessie is a Light Tamer with unique abilities, you will learn what 15 seconds do.Jessie is introduced to Amber, a girl that is angry at the world over her brother's death. Her sarcasm will have you laughing at her boldness. Amber was a loner, until Jessie came along and made her participate in life again.In mythology, Fate is three sisters. The one to begin your life, one to weave your life, and one to end your life. The one that weaves the story of your life needs the Light Tamers to banish Erebus. He is the God of Darkness. Erebus is on a mission to steal an original Light Tamer, but he must be vanquished back to the Underworld. When you challenge darkness, you risk your light being drained.Can true love conquer the Dark Ones. Be a fifteen year old all over again. This book will take you on a journey through first kisses, to bonding for life. Jessie will captivate readers with her likability. Caleb will open your heart to love and friendship. This story is for readers from 13 to 113.

Self-styled adventurer, literary wit, philosopher, and statesman of science, Pierre-Louis Moreau de Maupertuis (1698-1759) stood at the center of Enlightenment science and culture. Offering an elegant and accessible portrait of this remarkable man, Mary Terrall uses the story of Maupertuis's life, self-fashioning, and scientific works to explore what it meant to do science and to be a man of science in eighteenth-century Europe. Beginning his scientific career as a mathematician in Paris, Maupertuis entered the public eye with a much-discussed expedition to Lapland, which confirmed Newton's calculation that the earth was flattened at the poles. He also made significant, and often intentionally controversial, contributions to physics, life science, navigation, astronomy, and metaphysics. Called to Berlin by Frederick the Great, Maupertuis moved to Prussia to preside over the Academy of Sciences there. Equally at home in salons, cafés, scientific academies, and royal courts, Maupertuis used his social connections and his printed works to enhance a carefully constructed reputation as both a man of letters and a man of science. His social and institutional affiliations, in turn, affected how Maupertuis formulated his ideas, how he presented them to his contemporaries, and the reactions they provoked. Terrall not only illuminates the life and work of a colorful and important Enlightenment figure, but also uses his story to delve into many wider issues, including the development of scientific institutions, the impact of print culture on science, and the interactions of science and government. Smart and highly readable, Maupertuis will appeal to anyone interested in eighteenth-century science and culture. "Terrall's work is scholarship in the best sense. Her explanations of arcane 18th-century French physics, mathematics, astronomy, and biology are among the most lucid available in any language."—Virginia Dawson, American Historical Review Winner of the 2003 Pfizer Award from the History of Science Society

Praise for The Magnet® Method of Investing "Rather than encouraging the scatter shot approach of broad diversification, Jordan focuses on the rifle-shot Magnet® method of identifying a limited number of quality stocks to improve your chances of beating the market." —Sam Stovall, Chief Investment Strategist, Standard & Poor's Equity Research "Jordan Kimmel is one of the brightest market observers out there, and he is certainly a rising star that will be an important person to follow marketwise for many years." —Michael Burke, Coeditor, Investors Intelligence, Inc. "Jordan Kimmel's The Magnet® Method of Investing is an amazing, detailed, and intuitive book. I especially enjoyed Jordan's insights into diversification, the inefficient market, and identifying stocks that are in their 'sweet spot.' Jordan's writing style is also very straightforward and refreshing. He succeeds in taking complicated subjects and explaining them in an insightful way. This is simply an incredible book that is a must-read for both beginning and serious investors." —Louis G. Navellier, Chairman and founder, Navellier & Associates, Inc. "The Magnet® Method of Investing examines investing from a different perspective than many investors often see, offering a unique alternative to diversification. Jordan Kimmel has analyzed the methods of the best investors through time and introduces his robust stock selection process." —David M. Darst, CFA, Managing Director and Chief Investment Strategist, Morgan Stanley

Global Wealth Management Group "We welcome Jordan's book as a valuable perspective on investing. The Wall Street Transcript applauds money managers like Jordan who explain their philosophies clearly, support them with research, and back them up with performance data. This is a great addition to any investing reading list." —Andrew Pickup, Publisher and CEO, The Wall Street Transcript "The Magnet® Method of Investing takes on the important issue of diversification, which has been oversold to Main Street. This is yet another example of the need to 'go against conventional thinking' if you want to achieve superior results." —Stan Weinstein, Editor and Publisher, Global Trend Alert

She's changed...but has he? Skylar Gibson isn't the rebellious teen she used to be. Aaron Hollister, on the other hand, is still the entitled rich kid who betrayed her. And if he thinks she'll let his business plans threaten her town, well, he'd better think again. But her first priority is protecting her secret—their fourteen-year-old daughter. When the truth comes out, Skylar is shocked by Aaron's reaction. Could there be more to this golden boy than she'd thought? It'll take more than a trip down memory lane to prove he's changed....

I DON'T KNOW ANYBODY who has ever done such a daring thing as I have done, twenty-two-year-old Aileen Kilgore of Brookwood, Alabama, wrote in her diary in January 1944, after enlisting in the Women's Army Corps (WAC) during World War II. From basic training in Fort Oglethorpe, Georgia, to her discharge in late 1945, Kilgore served as one of more than 150,000 American women who joined the Women's Army Corps - the first group of women other than nurses to serve in the ranks of the United States Army. Aileen Kilgore Henderson has now collected and edited diary entries and personal letters that recount in an engaging narrative style her twenty-three months of experiences in the army. Recording the excitement and anxiety of enlisting, along with the camaraderie, challenges, and monotony of military life and labor, Henderson had a keen eye for the newness of her undertakings. She worked as one of only six female airplane mechanics at Ellington Air Force Base and as a photo lab technician, and she provides a detailed document of daily life in the service. Additionally, Henderson reveals the public scrutiny and criticism WAC members faced as they assumed nontraditional roles. A fascinatin

The memoir of a man and woman who escaped into the forest, joined the Jewish partisans—and fell in love—as Hitler laid waste to their Polish hometowns. Jack and Rochelle first met at a youth dance in Poland before the war. They shared one dance, and Jack stepped on Rochelle's shoes. She was unimpressed. When the Nazis invaded eastern Poland in 1941, both Jack (in the town of Mir) and Rochelle (in the town of Stolpce) witnessed the horrors of ghettoization, forced labor, and mass killings that decimated their families. Jack and Rochelle managed, in their separate ways, to escape into the forest. They reunited, against all odds, in the winter of 1942–43 and became Jewish partisans who fought back against the Nazis. The couple's careful courtship soon blossomed into an enduring love that sustained them through the raging hatred of the Holocaust and the destruction of the lives they had known. Jack and Rochelle's story, told in their own voices through extensive interviews with their son, Lawrence, has been in print for twenty years and is celebrated as a classic of Holocaust memoir literature. This is the first electronic edition. "A story of heroism and of touching romance in a time of fear and danger." —USA Today

Signal Processing for Neuroscientists introduces analysis techniques primarily aimed at neuroscientists and biomedical engineering students with a reasonable but modest background in mathematics, physics, and computer programming. The focus of this text is on what can be considered the 'golden trio' in the signal processing field: averaging, Fourier analysis, and filtering. Techniques such as convolution, correlation, coherence, and wavelet analysis are considered in the context of time and frequency domain analysis. The whole spectrum of signal analysis is covered, ranging from data acquisition to data processing, and from the mathematical background of the analysis to the practical application of processing algorithms. Overall, the approach to the mathematics is informal with a focus on basic understanding of the methods and their interrelationships rather than detailed proofs or derivations. One of the principle goals is to provide the reader with the background required to understand the principles of commercially available analyses software, and to allow him/her to construct his/her own analysis tools in an environment such as MATLAB®. Multiple color illustrations are integrated in the text Includes an introduction to biomedical signals, noise characteristics, and recording techniques Basics and background for more advanced topics can be found in extensive notes and appendices A Companion Website hosts the MATLAB scripts and several data files: <http://www.elsevierdirect.com/companion.jsp?ISBN=9780123708670>

The first Turing gate, a mere hundred nanometers across, is forced open in 1963, at the high-energy physics laboratory in Brookhaven; three years later, the first man to travel to an alternate history takes his momentous step, and an empire is born. For fifteen years, the version of America that calls itself the Real has used its Turing gate technology to infiltrate a wide variety of alternate Americas, rebuilding those wrecked by nuclear war, fomenting revolutions and waging war to free others from communist or fascist rule, and establishing a Pan-American Alliance. Then a nation exhausted by endless strife elects Jimmy Carter on a reconstruction and reconciliation ticket, the CIA's covert operations are wound down, and the Real begins to wage peace rather than war. But some people believe that it is the Real's manifest destiny to impose its idea of truth, justice, and the American way in every known alternate history, and they're prepared to do anything to reverse Carter's peacenik doctrine. When Adam Stone, a former CIA field officer, one of the Cowboy Angels who worked covertly in other histories, volunteers for reactivation after an old friend begins a killing spree across alternate histories, his mission uncovers a startling secret about the operation of the Turing gates and leads him into the heart of an audacious conspiracy to change the history of every America in the multiverse—including our own. This book is a vivid, helter-skelter thriller in which one version of America discovers the true cost of empire building, and one man discovers that an individual really can make a difference. From the Trade Paperback edition.
