New General Ledger Configuration in SAP ECC 6.0. The main purpose of G/L accounting in SAP is to provide a comprehensive picture of external accounting and accounts. Recording all business transactions (primary postings as well as settlements from internal accounting) in a software system that is fully integrated with all the other operational areas of a company ensures that the accounting data is always complete and accurate.

This second, updated, and extended edition of our standard reference book is your companion for the implementation of the new General Ledger. This book describes the optimal settings for ledger definition and document splitting, as well as the integration with accounting. Moreover, it includes a detailed description of parallel accounting, including segment reporting, storage location of data, and much more. A comprehensive chapter on migration as well as many practical reports shows what you need to consider for the changeover to New General Ledger. Design and Features of the Ledgers Get to know the ledger features (leading and non-leading ledgers), scenarios (business area, segmentation etc.), and the handling of custom fields. Integration in Financial Accounting Achieve an in-depth understanding of profit center accounting in the General Ledger, follow-up costs, and period-end closing. Parallel Accounting Explore the new parallel accounting options provided by ledger group-specific postings. Document Splitting Learn how to design, configure, and use document splitting, and get to

know the active and passive document split. Migration Discover the migration components, including migration project details, the Migration Cockpit, and how to successfully migrate from the Classic to the New General Ledger. Practical Reports Benefit from numerous real-life project reports, which can be put to practical use.

This book offers a comprehensive introduction to SAP ERP Profit Center Accounting (PCA) for both classic general ledger (GL) and the new GL. Get the tools you need to set profitability targets for business (planning) and then compare actual results against those targets to improve overall profitability. Solidify your understanding of the difference between PCA and SAP Controlling Profitability Analysis (CO-PA) views. Gain in-depth knowledge of the concepts, objects, and functionality available in PCA in SAP ERP, including the relevant master data set-up, actual data flows, planning scenarios, and reporting options. Clarify the differences between PCA and CO-PA and understand when it is best to use each. Dive into profit center transfer pricing and obtain detailed configuration and set-up steps required for activation. By using practical examples, tips, and screenshots, the author brings readers up to speed on SAP Profit Center Accounting.

discussion on SAP FICO along with comprehensive real life examples based on authors real life implementations. One of the first FICO books which cover business cycles rather than plain technical configuration. Targeting intermediate and advanced-level readers, this book discusses Implementation Tools; Enterprise Structure; New GL Configuration; Online Document Splitting; AR; AP; AA; Bank accounting; Integration of FI with Other Modules; Business Processes; Controlling; Cost Center Accounting; Product Costing; Material Ledger Configuration and Profit Center Accounting. The author has spent the last 10 years of his career acquiring this knowledge through the trial and error method. It covers the end user as well as technical configuration perspective. It can serve as a starting point for the people who want to comprehend how the financial and managerial accounting functions in an ERP. Most of the FICO text deals with technical configuration and throws little light on its functional implementation. This book is author s humble attempt to bridge the gap by providing real life scenarios along with technical details.

SAP is the world leader in Enterprise Resource Planning (ERP) software; of the software's modules, the FI (Finance) and CO (Controlling) are by far the most popular and are widely implemented. This book has no competition?it is the only book on the market on how to configure and implement SAP's FI and CO modules to maximize functionality and features hands-on, step-by-step instructions and real-world examples that provide immediate and practical solutions.

Updated for SAP's ECC 6.0, the book covers FI

functional finance professionals, and line-of-business managers with the implementation strategies, configuration steps, and best practices necessary to implement Document Splitting in the SAP General Ledger. Specific sections of the book focus on defining segments for use with common lines of business, configuration steps for Document Splitting, configuration of Segment Reporting, and managing a migration from the Classic General Ledger to the SAP General Ledger when Document Splitting is involved. Readers learn how to configure Document Splitting for the SAP General Ledger, including Standard and Extended Document Splitting and will quickly come to understand the common Business Transactions and how they relate to Segment Reporting and Document Splitting, including Vendor Invoice, Vendor Payment, and other financial transactions. Plus, find out how the new Segment object works in the SAP General Ledger, including how Segments are derived from Profit Centers. The author explains how best to use Profitability Reporting, Segment Reporting, and built-in tools like Report Writer and Report Painter in the SAP General Ledger and shows you how you can develop and execute a plan for migrating successfully to the SAP General Ledger using the SAP Migration Service.

Over the last few years, financial statement scandals, cases of fraud and corruption, data protection violations, and other legal violations have led to

numerous liability cases, damages claims, and losses of reputation. As a reaction to these developments, several regulations have been issued: Corporate Governance, the Sarbanes-Oxley Act, IFRS, Basel II and III, Solvency II and BilMoG, to name just a few. In this book, compliance is understood as the process, mapped not only in an internal control system, that is intended to guarantee conformity with legal requirements but also with internal policies and enterprise objectives (in particular, efficiency and profitability). The current literature primarily confines itself to mapping controls in SAP ERP and auditing SAP systems. Maxim Chuprunov not only addresses this subject but extends the aim of internal controls from legal compliance to include efficiency and profitability and then well beyond, because a basic understanding of the processes involved in IT-supported compliance management processes are not delivered along with the software. Starting with the requirements for compliance (Part I), he not only answers compliance-relevant questions in the form of an audit guide for an SAP ERP system and in the form of risks and control descriptions (Part II), but also shows how to automate the compliance management process based on SAP GRC (Part III). He thus addresses the current need for solutions for implementing an integrated GRC system in an organization, especially focusing on the continuous control monitoring topics. Maxim Chuprunov mainly targets compliance experts, auditors, SAP project managers and consultants responsible for GRC products as readers for his book. They will find indispensable information for their daily work from the first to the last page. In addition, MBA, management information system students as well as

senior managers like CIOs and CFOs will find a wealth of valuable information on compliance in the SAP ERP environment, on GRC in general and its implementation in particular.
