Discover the quiet magic of Chicago steel, American craftsmanship, and the way that time is indeed the revelator. And what does time reveal? It reveals that which perseveres, and that which falls away. In short, this book is a mash note to Chicago era steel. To forgotten bicycles still hanging in garages, waiting, waiting. To fathers and sons. To love, to loss. To reclaiming well-made machines from the maw of time. To putting right what one can put right with one's own hands, and doing it well. Chicago steel keeps it real. Cheers, Geoff

You never forget how to ride a bike . . . but do you know how to get a great deal on a used bike (and avoid getting ripped off!), set up your commuter bike for optimal safety (without sacrificing fun), plan the perfect family ride for kids of all ages, and train for your first endurance ride? Bicycle Times magazine reaches hundreds of thousands of "everyday cyclists"—riders who care more about having a great ride than spending a year's salary on a tricked-out racing bike. Their mission is to make cycling fun and accessible for everyone . . . families, commuters, travelers, and weekend warriors included.

As bicycle commuting grows in the United States, the profile of the white, middle-class cyclist has emerged. This stereotype evolves just as investments in cycling play an increasingly important role in neighborhood transformations. However, despite stereotypes, the cycling public is actually quite diverse, with the greatest share falling into the lowest income categories. Bicycle Justice and Urban Transformation demonstrates that for those with privilege, bicycling can be liberatory, a lifestyle choice, whereas for those surviving at the margins, cycling is not a choice, but an often oppressive necessity. Ignoring these "invisible" cyclists skews bicycle improvements towards those with choices. This book argues that it is vital to contextualize bicycling within a broader social justice framework if investments are to serve all street users equitably. "Bicycle justice" is an inclusionary social movement based on furthering material equity and the recognition that qualitative differences matter. This book illustrates equitable bicycle advocacy, policy and planning. In synthesizing the projects of critical cultural studies, transportation justice and planning, the book reveals the relevance of social justice to public and community-driven investments in cycling. This book will interest professionals, advocates, academics and students in the fields of transportation planning, urban planning, community development, urban geography, sociology and policy.
