Android ist der unumstrittene Marktführer bei den Smartphone-Systemen. Die c1-Redaktion hat Android unter die Haube geschaut und zeigt, wohin sich das Betriebssystem entwickelt. In der Diskussion um die Datenkrake Google fällt immer wieder die enge Verknüpfung mit Android auf, mehrere Artikel stellen dar, wie Sie Ihr Smartphone von den Google-Diensten entkoppeln können. Eine Teststrecke gibt Ihnen Tests und Kaufberatungen an die Hand, mit denen Sie im Dschungel aktueller Smartphones und Tablets den Überblick bekommen, zusätzlich hat die Redaktion die neusten Smartwatches auf ihre Alltagstauglichkeit untersucht. In einem großen Praxisteil erfahren Sie, wie man einfache Hardware-Defekte selbst beheben kann, wie Sie mit Apps mehr aus Ihrem Mobilgerät herausholen und den mobilen Begleiter voll auf Ihre Bedürfnisse einrichten. Darüberhinaus bietet das Heft zwei Aktionen: 50 Prozent Rabatt (gültig bis 31.5.2015) auf das Verbatim Dual USB Power Pack und die Sicherheits-App Mobile Security & Antivirus von Eset kostenlos für ein Jahr. OUR CULTURE HAS BECOME OBSESSED WITH HUSTLING. As we struggle to keep up in a knowledge economy that never sleeps, we arm ourselves with life hacks, to-do lists, and an inbox-zero mentality, grasping at anything that will help us work faster, push harder, and produce more. There's just one problem: most of these solutions are making things worse. Creativity isn't produced on an assembly line, and endless hustle is ruining our mental and physical health while subtracting from our creative performance. Productivity and Creativity are not compatible; we are stuck between them, and like the opposite poles of a magnet, they are tearing us apart. When we're told to sleep more, meditate, and slow down, we nod our heads in agreement, yet seem incapable of applying this advice in our own lives. Why do we act against our creative best interests? WE HAVE FORGOTTEN HOW TO FLOAT. The answer lies in our history, culture, and biology. Instead of focusing on how we work, we must understand why we work/why we believe that what we do determines who we are. Hustle and Float explores how our work culture creates contradictions between what we think we want and what we actually need, and points the way to a more humane, more sustainable, and, yes, more creative, way of working and living.

This second Preview Edition ebook, now with 16 chapters, is about writing applications for Xamarin.Forms, the new mobile development platform for iOS, Android, and Windows phones unveiled by Xamarin in May 2014. Xamarin.Forms lets you write shared user-interface code in C# and XAML that maps to native controls on these three platforms.

Proliferation of distributed generation and the increased ability to monitor different parts of the electrical grid offer unprecedented opportunities for consumers and grid operators. Energy can be generated near the consumption points, which decreases transmission burdens and novel control schemes can be utilized to operate the grid closer to its limits. In other words, the same infrastructure can be used at higher capacities thanks to increased efficiency. Also, new players are integrated into this grid such as smart meters with local control capabilities, electric vehicles that can act as mobile storage devices, and smart inverters that can provide auxiliary support. To achieve stable and safe operation, it is necessary to observe and coordinate all of these components in the smartgrid.
