CSS elements appear in green. HTML attribute names appear in light blue. HTML attribute values appear in magenta. Please note that the color of an item can change, depending on its context. For instance, when CSS elements are used within the style attribute of an HTML tag, they are color-coded as HTML attribute values (magenta) instead of CSS ...

Sams Teach Yourself HTML and CSS in 24 Hours, Ninth Edition

What is CSS? Cascading Style Sheets (CSS) is used to format the layout of a webpage. With CSS, you can control the color, font, the size of text, the spacing between elements, how elements are positioned and laid out, what background images or background colors are to be used, different displays for different devices and screen sizes, and much more!

HTML Styles CSS - W3Schools

Cascading Stylesheets — or CSS — is the first technology you should start learning after HTML. While HTML is used to define the structure and semantics of your content, CSS is used to style it and lay it out. For example, you can use CSS to alter the font, color, size, and spacing of your content, split it into multiple columns, or add animations and other decorative features.

Learn to style HTML using CSS - Learn web development | MDN
