Apoidea - Bees, Apoid Wasps -- Discover Life

A honey bee (also spelled honeybee) is a eusocial flying insect within the genus *Apis* of the bee clade, all native to Eurasia but spread to four other continents by human beings. They are known for construction of perennial, colonial nests from wax, for the large size of their colonies, and for their surplus production and storage of honey, distinguishing their hives as a prized foraging ...

The genus *Lasioglossum* (=Dialictus) in Halictidae is one of the largest genera of bees worldwide, with an incredibly diverse array of behaviors. Figure 1. Adult *Lasioglossum nymphale* Smith, a sweat bee, gathering pollen and nectar on goldenrod. Photograph taken in Highlands County, Florida.

sweat or halictid bees

Forty-two of the 425 genera of bees in the world (Michener 2007) occur in New York. Our most common (and speciose) genera are *Andrena*, *Lasioglossum*, *Nomada*, *Sphecodes*, *Megachile*, *Colletes*, *Osmia*, *Hylaeus*, *Melissodes*, *Bombus*, and *Coelioxys*. A survey of bee species in Pennsylvania (Donovall and vanEngelsdorp 2010) documented a total of 371 species, comparable to the number we report here for New York, but likely an underestimate given the size of Pennsylvania.

The Georgia Native Bee Biodiversity Assessment began in 2010 as a survey of the native bees of Georgia. Professor Mark Schlueter coordinates the project and the project’s lead taxonomist is Nicholas Stewart. The majority of native bee collections during 2010-2015 have been in North Georgia near apple orchards.

Bees of Georgia

Bee pollinators in the different experimental sites: (A) genera recorded at canola plot 1 (+pollinator habitat), (B) bee genera at canola plot 2 (- pollinator habitat), (C) bee genera in the samples from the pollinator habitat and, (D) frequency distribution of bee abundances for each of the genera sampled.

Bee genera, diversity and abundance in genetically ...

These genera include *Sphecodes* (10 spp. of parasitic bees), *Lasioglossum* (17 spp.), *Nomia* (4 spp.), *Agapostemon* (2 spp.), *Augochloropsis* (3 spp.), *Augochlora* (1 sp.), *Augochlorella* (3 spp.) and *Halictus* (4 spp.) (Pascarella 2006). Most of these species are also common throughout the eastern United States.
