Immunology
Mononegavirales. Vertebrates (including mammals and humans), invertebrates, and plants serve as natural hosts. Currently, 30 genera are recognised. Diseases associated with viruses of this family include rabies encephalitis caused by the rabies virus, and flu-like symptoms in humans caused by vesiculoviruses.

Rhabdoviridae - Wikipedia

Rhabdoviruses are negative, ss, monopartite RNA viruses. They are noninfectious because their negative sense RNA genome cannot be immediately translated upon entry into the cell. They do not have a 5' cap or a polyA tail. Their capsid is roughly bullet
